Autor: Movez @0xMovez **URL:** <https://x.com/0xMovez/status/2045794817154683194>

AI weather bot turned \$240 → \$82K on Polymarket weather markets

trained my agent, based on bot 2K trades, to build it from scratch

installed it on VPS, plugged weather API + Opus 4.7 & gave it Polymarket acc

in 2 days he found 2x - 400% ROI trades

run your agent in 5 steps:

- set up a VPS on Hetzner - \$5.99 • plug weather API on {visualcrossing} - free • run Hermes agent using one-liner code - free • connect TG bot + Opus 4.7 • prompt {weather trading logic} from article to agent

hermes is a self-trained agent, it needs enough trades {50-100} to build the best trading setup

start small {\$2-\$3} limit per trade across 20 weather markets, and let the agent do the rest

bot used for training: [https:// polymarket.com/@automatedAItradingbot?via=following](https://polymarket.com/@automatedAItradingbot?via=following) ...

my agent: [https:// polymarket.com/@hermesweather ?via=following](https://polymarket.com/@hermesweather?via=following) ...

In 2 days, the bot already made 2 trades with + 400% ROI and keeps improving quality of trading

...

The big winner is Seoul - you bought the 17°C bucket at 19 cents
and it's now trading at 91 cents as the forecast locked in.
That single position is +$3.60 on a $0.95 bet. Paris is also
moving your way at 27% (up from 19.5% entry).

The losers are Ankara (forecast drifted away from 19°C, now only
1.7%) and Seattle (52-53°F bucket down to 8.9%).

Note: The tracked bot balance shows -89.8% return because it only
