5 GitHub repos for trading Polymarket weather markets

From beginner-friendly to serious quant infrastructure

1. alteregoeth-ai/weatherbot

Pure Python weather trading bot for Polymarket. Uses three forecast sources: ECMWF, HRRR for US cities, and METAR observations.

Scans temperature markets, finds mispriced buckets, enters when EV is positive. Kelly Criterion position sizing + simulation mode built in.

GitHub: [http:// github.com/alteregoeth-ai /weatherbot ...](http://github.com/alteregoeth-ai/weatherbot)

2. suislanchez/polymarket-kalshi-weather-bot

Trades weather markets on both Polymarket and Kalshi simultaneously.

Uses 31-member GFS ensemble from Open-Meteo - converts ensemble agreement into a probability, trades when edge vs market price exceeds 8%.

React dashboard, FastAPI backend, SQLite tracking.

GitHub: [http:// github.com/suislanchez/po lymarket-kalshi-weather-bot ...](http://github.com/suislanchez/polymarket-kalshi-weather-bot)

3. hcharper/polyBot-Weather

Designed for regular hardware - Mac Mini, home PC, residential internet.

Gaussian probability model on top of NOAA data for weather markets.

Also covers crypto markets via Black-Scholes and binary arbitrage as additional strategies.

Copy trading built in - monitors top Polymarket wallet addresses on-chain and mirrors positions.

Streamlit dashboard for monitoring.

GitHub: [http:// github.com/hcharper/polyB ot-Weather ...](http://github.com/hcharper/polyBot-Weather)

4. yangyuan-zhen/PolyWeather

Monitors 52 cities. Uses DEB (Dynamic Error Balancing) - blends multiple model forecasts weighted by recent accuracy per city.

Generates calibrated probability buckets, scans Polymarket for mispricing.

Works via both web dashboard and Telegram bot.

GitHub: [http:// github.com/yangyuan-zhen/ PolyWeather ...](http://github.com/yangyuan-zhen/PolyWeather)

5. Polymarket/agents

Official repo from Polymarket. Reference implementation for connecting to Gamma API, fetching markets, querying news sources, and executing trades via CLOB.

The cleanest starting point if you're building a bot from scratch.

GitHub: [http:// github.com/polymarket/agents ...](http://github.com/polymarket/agents)
